**DETAILED ACTION**

***Status of the Claims***

1. This action is in response to the RCE filed on December 22, 2009. Claims 1-2, 4-10 and 12-34 are pending and examined below. Claims 1, 12-13, 24, 28, 30 and 33-34 are amended.

***Priority***

2. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 119(e) as follows:

3. This application is claiming the benefit of provisional applications including the provisional application No. 60/390,459, filed June 20, 2002 under 35 U.S.C. 119(e). However, this application was not filed within twelve months from the filing date of the provisional application, and there is no indication of an intermediate nonprovisional application that is directly claiming the benefit of the provisional application and filed within 12 months of the filing date of the provisional application.

4. Applicant is required to delete the reference to the prior-filed provisional application from the first sentence(s) of the specification.

***Specification***

5. The disclosure is objected to because of the following informalities: page 1 under section "RELATED APPLICATIONS" of the specification, the information related to the provisional application 60/390,459 needs to be removed because the current application

was not filed within twelve months from the filing of the provisional application.

Appropriate correction is required.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

7. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

8. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1 and 33-34 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over all the independent claims of U.S. Patent No. 7,548,883. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only substantial difference between the claims is the industry to which the invention is applied.

10. Claims 1, 33, and 34 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 10, 20, and 21 of copending Application No. 10/456,000, and claims 1, 12, 17, and 21 of copending Application No. 10/464,601. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only substantial difference between the claims is the industry to which the invention is applied.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Allowable Subject Matter***

11. Claims 1-2, 4-10 and 12-34 would be allowable if files a valid terminal disclaimer, set forth in this Office action.
